

Health & Safety Engineer (f/m/div)*

Job description

Do you want to help us to keep a safe and healthy environment? Here at Infineon we are highly devoted in providing the best working conditions to our employees. Are you an individual oriented to quality and safety? Are you organized and always paying attention on details? Then come and join our team in Cegléd as a Health & Safety Engineer.

As a Health & Safety Engineer you will be the responsible for the legal compliance of the company regarding occupational, health and safety and fire prevention issues.

In this new job you will:

- Prepare and participate in **internal and external audits or on authority inspections** of the specific field;
- **Maintain and update relevant documentation** related to health, safety and fire protection;
- Participate in **accident investigation/analysis** and **define corrective and preventive measures**;
- Take the **system responsibility for OHSAS18001 and IMPRES** (Infineon Internal management system);
- Conduct **Occupational and Health and Safety trainings**.

Profile

You are driven by quality, precision and focus on details. You are a proactive person that takes the initiative to develop new and creative ideas, always aiming for safety and improvement. Moreover, your strong communication skills allow you to establish positive and trustful relationships, both inside and outside your team and organization.

You are best equipped for this task if you have:

- Engineering Degree in **Health & Safety**, or a related topic;
- Minimum of **1-3 years of relevant experience** (preferably in an industrial environment);
- Experience in **fire protection or environment/waste management** is an advantage;
- Great set of **communication skills**, in order to convey proper Health & Safety technical information;
- **Hungarian fluency** is a must and good **knowledge of English** .

Please send us your CV in English.
