

Supplier Quality Management Engineer (f /m)

Job description

Quality and efficiency are key-drivers for successful results. Do you thrive when quality at its highest standards is required? Then this opportunity might be a good match for you. Join our successful team in Cegléd as a Supplier Quality management Engineer, where an interesting multinational working environment is waiting for you!

As a Supplier Quality Management Engineer, you will be responsible for managing supplier quality improvement topics.

In this new job, you will:

- Be responsible for checking the **feasibility of the suppliers** and the **release of new suppliers**.
- Release of **new/changed parts and processes at suppliers (VDA2, PPAP)**.
- **Support/lead supplier audits**.
- Handle **change management at suppliers (PCN)**.
- Create **specification requirements PS-B, PS-C**.

Profile

You are driven by quality, precision and focus on details. Your excellent analytical skills and logical thinking help you to understand even the complex processes from a technical point of view. Furthermore, you actively contribute to putting decisions to work as soon as they are taken and push ideas to their full implementation and application by supporting the team to excellence.

You are best equipped for this task if you have:

- **University Degree** in **Engineering** or equivalent degree.
- At least **2-3 years of experience** in production environment, preferable in Supplier Quality engineering or Material Engineering.
- Experience in new supplier releases, **PPA approval procedures**.
- Practice in **Supplier related audits**.
- **Willingness to travel**.
- **Hungarian is a must** and **good command of English** language. Knowledge of German would be a plus.

Please send us your CV in English.
